Allowable Subject Matter

1. Claims 22-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 22, Apostolos (US 6,833,815 B2) discloses a loop type meander line loaded antenna having a feed. Apostolos '815, however, fails to specifically teach a method for decreasing the VSWR of the loop type meander line loaded antenna by placing a strip of lossy dielectric material across the feed.

Claims 23-27 are allowed for depending on claim 22.

Regarding claim 28, Apostolos '815 discloses a loop type meander line loaded antenna having a feed. Apostolos '815, however, fails to specifically teach a method for decreasing the VSWR of the loop type meander line loaded antenna by placing a capacitor across the feed for frequencies below the frequency at which the antenna exhibits significant inductive reactance; and placing a series connected capacitor and resistor across the feed for frequencies above the frequency at which the antenna exhibits significant inductive reactance.

Claims 29-31 are allowed for depending on claim 28.

Regarding claim 32, Apostolos '815 discloses a wide bandwidth meander line loaded antenna comprising a loop type meander line loaded antenna having a pair of top plates and a feed therebetween. Apostolos '815, however, fails to further teach a layer of lossy dielectric material disposed across the feed in order to minimize the VSWR of the antenna.

Claims 33-38 are allowed for depending on claim 32.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,828,947 discloses a nested cavity embedded loop mode antenna.
